### **Social Stratification and Social Mobility**

SOSC 3880 Spring 2021

Wednesday and Friday 1:30PM-3PM, LTH

Instructor: Cameron Campbell (3345 Lifts 13-15/Lift 3)

20 August 2021 version

Inequality has reemerged as a central concern in social science research. Studies of social stratification and mobility seek to understand how patterns of inequality emerge and persist over time, and what the implications of inequality are for society, families and individuals. The course focuses on economic inequality and its relationship to education, employment, race and ethnicity, housing, and family structure.

Readings in the primary course text mostly refer to the US because the study of stratification and mobility has a long history there, the data and methods are well-developed, and the range of topics is broad. For the first two-thirds of the class we will focus on these readings as a starting point for class discussions of stratification, mobility, and inequality in general and in HK, the mainland and Asia.

The class will be organized as a seminar, with meetings focused on discussion, rather than lecture. I will begin each class session with introductory remarks on the topic at hand, and then we will have discussions led by teams of students. Assigned readings or viewing should be completed in advance of each class meeting. Starting from the 2<sup>nd</sup> week, students will be responsible for writing a half-page response to the assigned reading each week. The details are described below.

# Grading

Component	Percent
Discussion Leadership	15
Class Attendance	5
Proposed Questions for Class Discussion	20
Monthly Reflections	20
Class Participation	15
Proposal for Final Project	5
Final Project	20

## Discussion leadership

Teams of students will be responsible for leading discussion each week. The size of each team and the number of times each student will need to participate in a team will be determined by the total enrollment. Teams will be responsible for introducing each reading, reviewing the proposed questions at Canvas (described below) and selecting some for discussion, and managing the resulting discussion.

Normally teams will divide the assigned readings or viewings for the week among themselves, with each team member taking responsibility for a selection of readings or viewings. The team member will summarize the readings or viewings for which they are responsible, offer their thoughts or observations, and then call on classmates who posted relevant questions or responses to share them.

#### Class attendance

Procedures for recording attendance will depend on whether we are in person or online and will be described in the first week of class.

## Proposed questions for class discussion

Starting from the 2<sup>nd</sup> week, students are responsible for proposing a question for discussion on Canvas in advance of class. It should be no more than 100 words. It should raise a question clearly related to the reading to be discussed in class and should refer to points made in one or more of the readings for that week. I will grade the responses 0-5 as follows:

If you come across recent news reports, opinion pieces or other materials related to a week's reading, you may include links to them in your proposed question, and you may introduce them if you are called on by discussion leaders or the instructor.

- 0 No submission or completely off-topic. Your question must be clearly relevant to the topics of the assigned reading. Seriously off-topic questions will not receive credit.
- 1 Inadequate. Little or no engagement with the assigned reading or effort to develop a question.
- 2 Below average. Barely enough engagement with assigned reading and/or effort to develop a question.
- 3 Acceptable. Shows engagement with the reading or viewing, and a serious effort to come up with a question. This will be the most common grade.
- 4- Above average. Superior engagement with the reading and/or effort to come up with a question. Must connect to at least one of the readings or viewings for that week.
- 5 Superior. Excellent engagement with the reading and/or highly creative or thoughtful independent thinking about a question for discussion that is related to the assigned reading.

Discussion leaders do not need to post a question in the week in which they are leading discussion.

Because the questions are to be the basis for class discussion, and other students need to review them to choose some to upvote, there will be no credit for late postings.

Proposed questions will normally be due 24 hours before class. I expect you to review the proposed questions before each class and 'like' a few that you would like the discussion to focus on. This will help the discussion leaders and myself identify questions of broader interest to the class. You may also comment on questions proposed by others to express support, or add details.

### Monthly Reflections

Once a month, that is roughly once every four weeks, you will be required to write a reflection on what you have learned from the readings and discussions for that month. It should be 500-100 words and should show that you have done the assigned reading and paid attention to class discussion.

### Class participation

Students are expected to participate in class discussion. The TA will track contributions to discussion.

When called upon by the instructor or discussion leader to share the question or response they posted to Canvas with the class, students should be prepared to introduce their question or response. Please review your post before coming to class so that you are ready to share it if called on. You should not need to review your response or question when you are called on.

Other contributions to discussion should reflect familiarity with the assigned readings.

Your activity upvoting/commenting on questions proposed for class discussion will be reviewed and will also count under class participation.

## Proposal for final project

By week 7, students should submit a short proposal (250 words or so) describing their plans for their final project. They are welcome to discuss this with me in advance and may amend their plans afterwards.

# Final project

For the final project, students may produce 1) a review of a major book on inequality, 2) a literature review, 3) a research proposal, 4) or a research project, according to their interests. It should be approximately 2000-2500 words, double-spaced, not including references. This will usually be about 8-10 typed pages.

A book review should be on a major recent book related to the topic of inequality. The review should summarize the book, including its methods, data, and key findings, and discuss it in the context of the material covered in class. Students are welcome to select one of the books excerpted in Grusky and Hill (2018) and read the original in its entirety and report on it.

The literature review should introduce and discuss 5-8 academic journal articles on a specific topic related to inequality and the themes of the class. Normally the articles should be from major academic journals. The selection of articles should include some recent ones. A literature review should include not only summary of the works including the data and the methods, but some reflections on your part and some comparison of the different works.

### **Academic Integrity**

All the work you submit must be new, and not previously submitted in any other class. If you are working on a related topic for another class, you will need to inform me and the other instructor so that we can coordinate. It is not acceptable to submit the same work for credit to two classes, unless both instructors consent beforehand, and an arrangement is in place to ensure that the total amount of work is equivalent to two projects done separately.

## Required Reading and Viewing

David B. Grusky and Jasmine Hill, eds. 2018. *Inequality in the 21st Century*. Routledge.

This book is available electronically at the library website. Hard copy will be available at the bookstore.

You will also be required to watch selected videos from Raj Chetty's online course at Harvard, Using Big Data to Solve Economic and Social Problems: <a href="https://opportunityinsights.org/course/">https://opportunityinsights.org/course/</a> These will be indicated below as Chetty Lecture X, where X is the number of the lecture.

Additional materials may be announced during the semester.

## Suggested reading and viewing

#### Websites

I will refer to these websites frequently during class. Make sure to visit each of them before the first class.

Inequality.org at the Institute for Policy Studies <a href="https://inequality.org/">https://inequality.org/</a>
Opportunity Insights - <a href="https://opportunityinsights.org">https://opportunityinsights.org</a>
World Inequality Database - <a href="https://wid.world/">https://wid.world/</a>

Center for Equitable Growth - <a href="https://ceg.berkeley.edu/">https://ceg.berkeley.edu/</a>

#### **Schedule**

In the following, items identified as *Background* should be read before class, but do not need to be included in student presentations. Items identified as *Further Reading* are optional and included because they may be of interest to students seeking more information about the topic.
