

**PPOL5120/SOSC5790 Research Methods in Public Policy
Spring 2022**

Course Description

The purposes of the course are to introduce to students key concepts in research methods, and to help them develop skills in the design of empirical research used in the analysis of policy problems. Specific emphasis will be on the use of quasi-experimental designs in policy research, as well as on their potentials and limitations.

Upon completion of the course, students should 1) understand the logic of policy research on causal relationship; 2) have a working knowledge on key research designs for generalized causal inference, with a good understanding of their potentials and limitations; 3) be able to put together a research proposal on a given research topic in their chosen fields; and 4) gain practical experience in conducting policy research.

Required Textbooks

Shadish, W. R., Cook, T. D. and D. T. Campbell. (2001). *Experimental and Quasi-Experimental Designs for Generalized Causal Inference*. Belmont, CA: Wadsworth

Assessment and Grading Criteria

Details for each assignment will be provided in class:

| | Due date | Weight |
|-------------------|-----------|--------|
| Assignment #1 | (Week 5) | 15% |
| Assignment #2 | (Week 9) | 15% |
| Assignment #2 | (Week 11) | 15% |
| Research Proposal | (Week 13) | 35% |
| Class Discussion | | 20% |

Course Outline and Readings

Please note that this outline may be subject to change to adapt to students' needs along the way.

Week 1 (February 10): Fundamental Concepts in Policy Research
